

A whole new concept in label applicators!

Model WP-20: A wipe-on type label applicator with a difference. Our patented **Channel Slide™ Technology** allows us to produce a wipe-on applicator that doesn't require air suction to hold onto a label. This means no noisy compressor and no custom suction plates. This all comes without sacrificing the versatility of a wipe-on applicator. Apply labels to boxes, clamshell containers, envelopes, square bottles and almost any other flat item you can hold. Best of all, the simplicity of the WP-20 makes it affordable for all!

Key Features

- Applies labels accurately with a simple wipe motion.
- Labels flat items - rigid and semi-rigid
- Durable powder coated steel and aluminum construction
- Electronic sensor and powerful DC motor advances labels for quick application.
- Waste liner paper wound up for easy disposal

Specifications

- 13.5" wide x 27.5" long (w/ 8" channel) x 15" tall
- Electric: 115 Volt AC (230 Volt optional)
- Approx. Weight: 36 pounds

Label Sizes

- Applies rectangular, oval and round labels, Die cut, min 1/8" gap between labels
- Label Rolls: max 10" diameter, 3" diameter core
- Label Width: min 1 1/2", max 5 3/4"
- Label Length:
 - 5 1/8" to 7 1/2" with 4" channels
 - 7 1/8" to 9 1/2" with 6" channels
 - 9 1/8" to 11 1/2" with 8" channels
